EXPERTISE

Aiolane's core areas of expertise cover full-cycle enterprise web & mobile development, private and public blockchain development, cloud infrastructure services, site reliability engineering, and DevOps. The flexibility of our business model allows us to help you with everything from lean PoC development to production-grade applications, whether you're a startup or a large company.

APPROACH

We use proven industry approaches (from traditional Waterfall to modern Agile) and flexible engagement models, including fixed price, time & material, and dedicated teams.
